NGUYEN DUC DUY

SOFTWARE DEVELOPER STUDENT

I am a 20 years old student with a strong affinity for graphic design, I am excited about the intersection of creativity and technology. Proficient in HTML, CSS, and JavaScript, I'm working towards bringing my design ideas to life through user-friendly web experiences. Driven by a passion for both frontend development and design aesthetics, I am eager to contribute a creative perspective to projects. I'm dedicated to refining my skills and applying them in innovative ways to create visually appealing and impactful solutions. I'm enthusiastic about learning and growing in a dynamic field that merges my love for graphic design with cutting-edge technology.
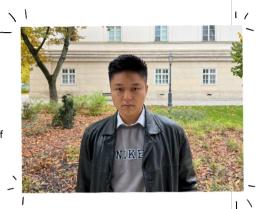

WORK EXPERIENCE

Assistant to Mother & Father in the family business

- Collaborated closely with my mother and father in managing various tasks.
- Assisted with carrying and organizing items.
- Developed a strong sense of responsibility and commitment while helping with daily operations.
- Gained experience in time management and multitasking by juggling different tasks to ensure smooth operations.
- Exhibited adaptability and problem-solving skills when addressing unexpected challenges.
- Contributed to maintaining a positive and productive work environment by showing a willingness to learn and take on new tasks.
